

## APRIL NEWS IN FIRST GRADE

Can you believe that we are in the last trimester of first grade? We have been learning so many wonderful things. One of the most impressive is how far the students have come in their reading development. My students are reading stories!!! It makes me so proud to see their progress throughout the year. That is one of the reasons I love teaching first grade.

We are going to continue with blends in phonics, understanding plot, and character settings in reading, and of course increase our fluency.

In math we are going to be working on our number facts and start to add three numbers.

We will talk about the Earth on Earth Day later in the month and how we can take care of God's creations.

In religion we continue to work on forgiveness.
